#### 1. Introduction

Security services or persons provided to public / private sector to protect the assets, property and personnel etc. from a variety of hazards such as waste, damaged property, unsafe worker behaviour, criminal activity such as theft, etc. by enforcing preventative measures. Security guards do this by maintaining a high-visibility presence to deter illegal and inappropriate actions, looking either directly, through patrols, or indirectly, by monitoring alarm systems or video surveillance cameras for signs of crime or other hazards such as a fire, taking action to minimize damage such as warning and escorting trespassers off property, and reporting any incidents to their clients and emergency services such as the police or paramedics.

Security guards and their officers are generally uniformed to represent their lawful authority to protect private property. Security guards are generally governed by legal regulations, which set out the requirements for eligibility (e.g., a criminal record check) and the permitted authorities of a security guard in a given jurisdiction. The authorities permitted to security guards vary by country and subnational jurisdiction.

Until the 1980s, the term watchman and then night-watchman was more commonly applied to this function. Both the terms were replaced with the modern security-based titles. Security guards/officers are sometimes regarded as fulfilling a private policing function.

Security services have significant role in the life of every human being, though one may not truly sense its importance in our daily routine. Thus, the importance of Security services may be determined according to its usefulness in our daily life. Therefore, industry expectations for skilled workforce are also dynamic which can only be managed through setting relevant competency standards in collaboration with the leading industries. Being familiar of this fact, National Vocational & Technical Training Commission (NAVTTC) developed competency standards for Security services under National Vocational Qualifications Framework (NVQF). These competency standards have been developed by a Qualifications Development Committee (QDC) and validated by the Qualifications Validation Committee (QVC) having representation from the leading agencies of the country.
